Studies Show...Chiropractic Care Can

BOOST Your Immune System by **200%!**

Vol. 33, Issue 5

“ I have never seen a group other than this Chiropractic group to experience a **200% increase over the normal patients! ”**
~Ronald Pero, Ph.D

One of the most important studies showing the positive effect Chiropractic care can have on the immune system and general health was performed by Ronald Pero, Ph.D., Chief of Cancer Prevention Research at *New York's Preventive Medicine Institute* and professor of medicine at *New York University*.¹

“We Have Never Seen Such a Positive Improvement in a Group.”

Dr. Pero measured the immune systems of people under Chiropractic care as compared to those in the general population and those with cancer and other serious diseases.

The Results Are Astounding!

In his initial three-year study of 107 individuals who had been under Chiropractic care for five years or more, the Chiropractic patients were found to have a **200% greater immune competence than people who had not received Chiropractic care, and 400% greater immune competence than people with cancer and other serious diseases.**

Dr. Pero stated, “When applied in a clinical framework, **I have never seen a group other than this Chiropractic group to experience a 200% increase over the normal patients!** This is why it is so dramatically important.”

More results inside!
