

JUST ONE *Chiropractic Adjustment*

Can Bring About an **IMMEDIATE Immune Boost!**

If you've been paying attention to current events, you are no doubt aware about how dangerous this year's flu season has been compared to previous ones.

Our immune system is a vital part of us staying healthy, as well as our body being able to function to its potential.

The main role of our immune system is to *protect and fight* against infectious agents and bar them from entering our bodies.

Your Body Needs "Clear Pathways" for Maximum Health!

When you have **subluxations or misalignments in your spine**, your brain isn't able to send and receive the proper messages with your immune system to help it protect itself from whatever virus is going around.

A weakened immune system lowers your body's response to a foreign body, such as the cold virus.

And if a bug is able to get into your system, your brain needs to be able to tell your body how to fight it off.

This is made possible with **proper spinal alignment** as the pathways become clearer and communication more effective.
